

VID-18

Management of closed calyx stone using the flexible renoscopy

M. Elkhoully

Zulekha Hospital, Dubai, United Arab Emirates

In this video we will explore the ability of flex ureters copy in the difficult cases of stones in a closed calyx without communication to the pelvi calyceal system.

Step by step video technique orientation.

Conclusion: The flexible renoscopy is the best modality in management of calyceal stones and calyceal stenosis as well.
