A novel and fast approach to ureteric stones: An audit and video presentation

A. El-Musbahi, M. Al-Shrani, Q. Javed

Al Ahli Hospital, Doha, Qatar

A unique and novel technique that has been invented and performed by the first author (Dr. El-Musbahi) over a period of five years and in excess of 384 cases where the ureteroscope was passed into the ureter without any prior cystoscopy, retrograde or dilatation and the stone is either passed or fragmented.

This technique is safe and fast in making these patients return to work in a short time. The paper presents this audit and a short video to show this technique.

As published in the Supplement of AFJU, Volume 18 (2012), 1st ESD "Experts in Stone Disease" Conference (page 20)
